University of California, Berkeley

- B.A. in Cognitive Science
- Berkeley Certificate in Design Innovation (BCDI)
- SEED Honor Scholars

KEY SKILLS

Experience with:

- HTML + CSS
- Python + SQL
- Scikit + Pandas + Matplotlib
- React.js

Workflows and tools:

- Figma
- Github
- Jira + Miro
- Adobe Creative Cloud
- InDesign + Photoshop
- Rhino 3D + Blender

AI-Assisted Code Development:

- Copilot
- Claude Code

ACHIEVEMENTS & AWARDS

- Ray Miles Scholarship
- Kapor & Kapor Klein Scholarship
- NCAL Scholarship
- 2022 Graduating Salutatorian

LANGUAGES

- English
- Spanish

WORK EXPERIENCE

Lead Designer — Project Reboot, *Berkeley, CA | Oct. 2026 - Dec. 2026*

- Researched, presented, and iterated on creative solutions at similar organizations
- Designed 2026 merchandise run in collaboration with program officials

UX/UI Clinical Research Intern — CALI, *Berkeley, CA | Sept. 2026 - Dec. 2026*

- Conducted research on wearable health solutions for mental-health tracker
- Compiled UX/UI data on material design, digital interfaces, and data visualization
- Researched human-computer interaction implementations in the market

AI Enablement Intern — AutoRABIT, *Remote | Jun. 2026 - Aug. 2026*

- Developed CODAA (CoE On-Demand AI Advisor) to promote safer internal AI use in-line with company AI policies and guidelines through a single right-click
- Joined AI Governance Committee to build internal AI policy and best practices

UX/UI Intern — Hortus AI, *Oakland, CA | Jan. 2026 - Apr. 2026*

- Delivered 30+ high-fidelity designs and components at AI infrastructure startup
- Designed user flow to maximize click-through rates, reduce friction, drive CTAs
- Directed product demo video and developed newsletter themes
- Led design demo segments during weekly Sprint Reviews

Coding Instructor — Learn2Code, *Bay Area, CA | Dec. 2023 - Jun. 2025*

- Managed classrooms of 20+ elementary students at beginner computer literacy
- Mentored students on coding basics, design thinking, and problem solving skills
- Led robotics lessons with LEGO Spike Essential, creating functional hardware

"Bonbon!" Illustrator, Co-author — Eastwind Books of Berkeley, *Fall 2023*

- Illustrated 20+ pages for children's book published through Eastwind Books
- Received "Best Illustration" and "Best Overall" awards in cohort of 10+ teams
- Prototyped style, theme, formatting, brand guidelines and brand assets

ACADEMIC PROJECTS & ORGANIZATIONS

Ants Vs. SomeBees — CS61A: Structure & Interpretation of Computer Programs

- Engineered turn-based game logic using recursion to manage multiple dynamic states in functional tower defense game sim using Python
- Implemented 10+ object entity subclasses using OOP principles

Analysis of Solar Cycles — EPS 88: Data Science for Earth Sciences

- Independently designed and implemented a data analysis project investigating correlations between solar activity affecting satellites, GPS, and power grids
- Built Python data pipelines to clean geomagnetic and solar cycle datasets from NOAA and GFZ Potsdam
- Built Matplotlib visualizations of solar cycle trends spanning several decades

Design Committee Member — Open Project @ Berkeley | *Sept. 2026 - Present*

- Collaborated on club graphic design, merchandise, and creative direction
- Implemented front-end website design upgrades for campus partners and clients
- Developed UX/UI design and creative themes for Chessblitz

Youth Advocacy Committee — Project Reboot @ Berkeley | *Sept. 2026 - Present*

- Developed creative outreach solutions including posters, pamphlets, etc.
